## Convey Student Response Software

### Drives Engaging Formative Assessments

Easily create and organize questions into playlists for either student or teacher paced assessment sessions. Let students progress at their own rate or keep the class all together.

### Increase Student Engagement

Each student is compelled to respond, no "hiding in back". Students get instant feedback on each question, so does the educator. This allows for immediate remediation.

### Use Your Curriculum Today!

You likely have a wealth of material you'd like to use. With Convey's floating Question Player you can poll with any resource. Its easy to create an answer key-then ask questions in any order you like.

### Reporting, grading and record keeping

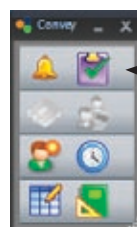

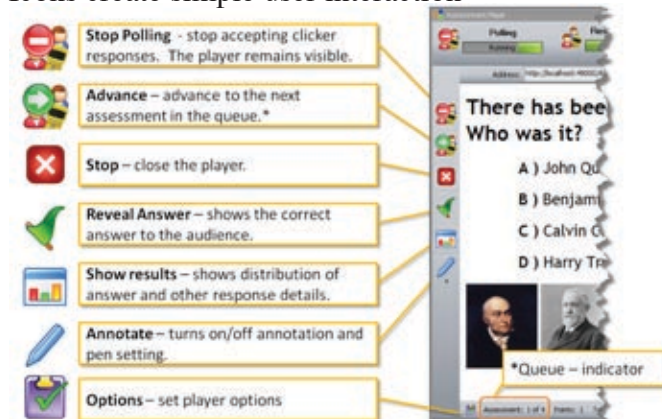

Educators can download lesson results into Microsoft Excel for classroom monitoring. Convey Student Response also aggregates data through Convey Enterprise to administration for tracking at the classroom, school or district level.

### Save Time with Crop and Go®

Convey's exclusive Crop and Go® technology swiftly integrates your existing curriculum without having to retype or cut and paste. Simply Crop and Go!

## Convey Student Response Interface

Icons create simple user interaction

The Convey Quicklauncher enables users to quickly and easily run the basic functions of Convey Student Response.
